

# BRAZING

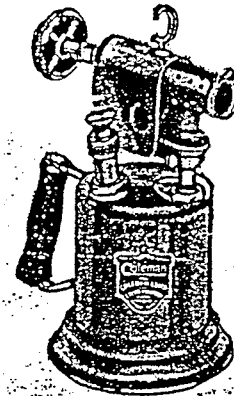

# TORCHES

No. 101, 102

No. 151, 152

No. 201, 202, 203, 204

Model: 101, 102 for gasoline (petrol) only—Efficient blow torch for general use—removable gas tip. Regulating valve stem is of the solid type. The positive shut-off valve prevents enlargement of gas tip orifice.

Model: 151, 152 for gasoline (petrol) only—Dependable mechanic's blow torch at a medium price with a powerful rugged burner, removable gas tip and replaceable self-cleaning needle and slip-on windshield.

Model: 201, 202 for gasoline (petrol) only—Heavy duty mechanic's blow and brazing torches. The heavy two-piece burner develops a powerful blast under the most severe conditions. Removable gas tip and replaceable self-cleaning needle. Large removable windshield.

Model: 203, 204 for kerosene (paraffin) only—Same as Models 201, 202, but built for use with kerosene.

## FEATURES OF COLEMAN BRAZING TORCHES

1. Solid-drawn heavy duty brass bodies. Extra heavy brass bottoms. (Models 101, 102 use terne plate bottoms).
2. All joints are first mechanically sealed and then securely soldered for double protection.
3. Sturdy bottom filler plug.
4. Positive shut-off fuel valve.
5. Removable gas tip.
6. Replaceable self-cleaning needle (except Models 101, 102).
7. Heavy long-life burners.
8. Cool Bakelite regulating valve wheel (except Models 101, 102).
9. Heavy duty pump.
10. Each torch is thoroughly inspected and given a pressure test as well as a burning test before leaving the factory.

## PARAFFIN

(KEROSENE)

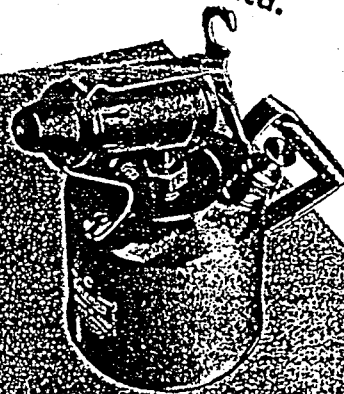

# BLOW LAMPS

SIMPLIFIED EUROPEAN TYPE  
Will work with any grade of Paraffin Oil

- Simple Pump with Cork Check Valve, interchangeable with Pump Valves of European-made Blow Lamps.
- Long-life Burner made of brass with extra-high copper contents.
- Heavy-gauge Brass Container will withstand 200 lbs. pressure.
- Flame regulated through Air-Release, no shut-off valve.

The first Paraffin Blow Lamp of this simplified type ever made in North America.
